There is therefore a total percentage increase in the population size and distribution in 2021 as compared to 2010 (2010 PHC).

According to the 2010 PHC District Analytical Report, the total population of Ga Central Municipal Assembly was 117,220 with female constituting 59,899 representing 51.1percent and 57,321 males representing 48.9 percent leading a sex ratio of 95:7.

The 2021 PHC shows a decrease of 0.3% in the total number of males as compared to 2010 and a 0.3% increase in the total population of female. It is projected that, the age distribution 0-14 of males will be estimated at 59,894 representing 35.1%, female 57,505 representing 33.7%. Ages 15-64

comprise of male population of 106,820 representing 62.6% and female 108,868 representing 63.8%. Lastly ages 65+ depict 39,247 males representing 2.3% and 42,660 females representing 2.5%.

It is also projected that the fertility rate of 3.1 births per women in 2010 will see an increase or decrease in birth per woman in 2021 which will be higher or lower than the regional average (2.6 births per women). The fertility age of a woman 15-49 years is 34,365 out of the total population of female with 3,193 number of births in the last 12 months. 84,297 (71.9%) residents living within the Municipality are migrants.

4.0 Goals

The goal of the Ga Central Municipal Assembly is "to improve the lives of the people in the Municipality by providing essential services and to promote growth in all sectors".

5.0 Core Functions

Section 12 of the Local Governance Act, 2016 (Act 936) empowers the District Assembly to exercise deliberative, administrative, and executive functions. The following are the core functions of the Ga Central Municipal Assembly:

- Formulate and execute plans, programmes and strategies for the effective mobilization of the resources necessary for the overall development of the Municipality;

- Perform such other functions as may be provided under any other enactment

6.0 District Economy

The Ga Central Municipality is projected to have an economically active population. The structure of the local economy is gradually shifting away from Agriculture activities.

The informal sector is the largest employer in the Municipality, followed by the private formal sector. The Municipality is fortunate to have a few companies, industries, financial institutions, coupled with enormous small-scale businesses. These institutions contribute a lot to the Assembly's Internally Generated Funds as well as provide employment for most of the inhabitants.

In spite of the seemingly booming economy, there are a lot of challenges in the Municipality. The high levels of unemployment with it associated vices and the lack of access to credit faculties for Small-Scale Enterprise owners are the key challenges facing the growth of the Municipal economy.

6.1 Agriculture

The major agricultural activity within the Municipality is poultry rearing. The predominant poultry birds reared include; ducks, fowls, guinea fowls, quails and turkeys. Livestock such as pigs, sheep, goat, rabbit, cattle and grasscutter are also reared in the municipality. Tree crops such as mango, coconut, avocado pear, sour soup are also grown on individuals' plots. Container farming of vegetables is also predominant in the Municipality. Farmers are also engaged in mushroom, snail, and aquaculture (catfish and tilapia) farming municipal-wide.

6.2 Road Network

GCMA is linked to major tarred roads, specifically; the Awoshie-Pokuase, and the Kwashieman-Ofankor roads. The Municipality can also boast of few arterial roads comprising of the Tabora Main, Tabora By-pass, Race Course, Chantan area roads, Lomnava area roads, Bokoboko, Fanmilk-Sowutuom roads and few tarred roads which mostly are in bad state.

The Municipality is easily accessible to the Trans- Continental Road from Lome (Togo) to Abidjan (Ivory Coast). The Trans-Continental Road serves as the Nation's Number One (N1) road linking to the main national harbour at Tema.

The Municipality has just about 53 kilometres of tarred roads representing 8% of an approximate total of 660 kilometres of road or more that the Municipality can boast of. On all whole, road accessibility within the Municipality is generally poor.

6.3 Energy

The Energy sector is vital for the social and economic development in the Municipality and the nation as a whole. The main source of energy in the Municipality is electricity. The entire population has access to electricity. A small proportion of the Municipality uses private generators during the normal power outages and the rest of the households use other alternatives like flash lights, candles, solar etc. In terms of cooking, gas is the main source of energy in the Municipality.

6.4 Health

There are 33 health facilities within the Municipality. Three (3) have elevated to the status of hospitals, seventeen (17) clinics, three (3) CHPS compounds and eight (8) maternity homes. The three main private hospitals are Agbeve Herbal at Sowutuom, Deseret at Santa Maria, and Mary Lucy at Awoshie. These health facilities render laboratory, pharmacy, family planning, reproductive and child health and maternal services. The Municipality also has high patronage of herbal clinics.

Ga Central Municipality has six (6) Public Health facilities, namely;

- Municipal Health Clinic, Kwashiebu
- Abease Health Facility (which is about 75% complete)

- Anyaa Terminal Clinic
- Olebu Clinic
- Three (3) No. CHPS Compounds which only offer first aid for minor ailments.

The Municipality has about 152 pharmacy and chemical shops / stores which cater for dispensary of drugs to clients.

NB: there are high rates of Doctor-Patient as well as Nurse-Patient ratios at the public facilities;

- Population to Doctor Ratio is 26,641:1 (public facility)
- Population to Nurse Ratio is1,731:1 (public facility)

Other major challenges affecting health care delivery within the Municipality are issues pertaining to inadequate health facilities/ infrastructure and inadequate health supplies/ logistics for which the provisions have been made in the budget to address.

The top ten (10) prevailing diseases recorded in health facilities within the Municipality during the period under review are as follows;

6.5 Education

GCMA has a total of fifty (50) public schools at different levels being run in only seventeen (17) educational blocks. There are a total of six hundred and ninety-eight (698) private schools within the Municipality. The distribution of schools within the Municipality are shown on Table 1 below;

Table 2: Distribution of schools with the GCMA

| LEVEL | PUBLIC SCHOOLS | PRIVATE SCHOOLS | TOTAL |
|--------------------|----------------|-----------------|-------|
| KINDERGARTEN | 16 | 273 | 289 |

| SENIOR HIGH SCHOOL | 1 | 5 | 6 |
| TOTAL | 50 | 698 | 748 |

Source: Municipal Education Directorate, 2023

The Municipal also has three (3) tertiary institutions which are the Pentecost University College (PUC), Maranatha University and Catholic Seminary where Catholic Priests and Brotherhood are trained. All the three tertiary institutions are located within the Sowutuom electoral area.

The main problem facing the educational sector in the Municipality is inadequate infrastructure which has led to overcrowded classrooms. The current number on roll in the public schools is between 55 to 70 pupils per class. This situation puts a lot of stress on the teachers and makes learning environment not conducive for the pupils. There is the urgent need to construct additional classrooms to solve this problem. The Teacher: Pupil ratio prevalent in the Municipal is 1:34.

6.6 Market Centres

The most common occupation in the Municipality is commerce and trading. This is obvious owing to the that almost all houses have a kind of either shop built—in structure or 'table' in front trading. Other noticeable trading activities include block making, dress

making, mechanic garages, hawking, etc. The Municipality has 2 vibrant open markets where food stuffs are sold; that is, the Anyaa and Chantan markets.

6.7 Water and Sanitation

GCMA has a few water bodies running through the Municipality; notable among them are the Lafa, Olebu streams, etc. Currently, these water bodies are not being properly maintained and are gradually collecting waste materials in the form of used papers and polythene bags.

Perennial water shortage is predominant within the Municipality. GCMA has limited access to potable pipe borne water, thus most of its residents' resort to poly tanks, concrete-built tanks to store water and whiles others also depend on borehole water. Some residents also harvest rainwater during the rainy seasons. Access to potable water within the Municipality becomes the most essential commodity during the dry season leading to the charging of exorbitant fees by operators of water tankers who ply their trade within the Municipality. A major concern is the fact that the quality of the water supplied by these water tanker operators is not guaranteed considering the health implications of consuming unwholesome water.

The GCMA has no final disposal sites for both liquid and solid wastes. This situation increases the cost of final disposal of waste due to travel distance. The Assembly also has no land to develop into an engineered Land-fill site for the final disposal of its waste. To address these challenges, the Assembly has partnered a private company for final disposal of solid waste and has also entered into franchise contracts with private companies to provide waste management services within the Municipality. These companies include; Honest Waste Company Limited, Tropical Waste Company Limited, Tiger Waste Company Limited, Blue Olives Company Limited, City Top Company Limited, Asadu Royal Seeds and Waste Management Company Limited.

GCMA currently depends on Adjen Kotoku liquid waste treatment facility owned by Zoomlion and the sewerage treatment plant located near Korle-Bu in Accra for the final

disposal of liquid waste. Grey water management remains a major challenge for the Municipality. This is due to the absence of major primary drains to receive the huge volumes of grey water generated within the Municipality. The few existing ones frequently get silted and do not serve their purpose. The Assembly has over the years not relented and will not relent going forward in the construction of more drains and desilting of existing ones in other to curb these challenges.

6.8 Tourism

The main and only festival among the Ga people is Homowo (Hooting at Hunger). The rationale behind the festival is to celebrate good harvest and promote peace between families and among friends.

6.9 Environment

The main type of soil within the Municipality is the Coastal Savannah Ochrosols. This soil is rich in sandstone and limestone and is a good source of material for the construction industry. The Municipality falls within the coastal savannah agro-ecological zone.

6.10 Climate

The Municipality falls within the coastal savannah agro-ecological zone. February and March are normally the hottest months. Temperature is generally high throughout the year, which contributes to the major and minor rainfall seasons experienced in the Municipality. Rainfall pattern is bi-modal with the average annual temperature ranging between 25.1oc in August and 35oc in February through to June. The major rainfalls are experienced between the months of May to July and minor between September and October. These rainfall patterns ideally provide suitable environmental conditions for farming activities to enable residents practice backyard gardening and peasant farming of different crops within each season.

The main challenge facing the sector is getting reliable and safe water sources for cultivation apart from the phenomenal land problem. The Municipality, however, has various water courses running through it which could be utilized for irrigation purposes.

7.0 Key Issues/Challenges

- 1. Limited land for large scale farming purposes
- 2. Poor road networks
- 3. Poor drainage systems
- 4. Inadequate infrastructure which has led to overcrowded classrooms
- 5. No Final disposal sites for both solid and liquid waste management

12.0 Revenue Mobilization Strategies

The most important leg of a budget is the revenue leg. This is because it is the determinant of what can and cannot be done. For the budget year 2024, the GCMA seeks to raise a total IGF revenue of Six Million, Seventy-Four Thousand, Three Hundred Ghana Cedis (GH¢6,074,300.00) to complement the budgeted revenue from Central Government and other related revenue sources to carry out the planned activities and programmes for the year.

The focus areas for the revenue mobilization strategies outlined in the table below borders on the strategies the Assembly seeks to roll out during the Budget Year 2024 to raise the approved IGF revenue. This is because as an Assembly, we have control on the mobilization of IGF revenues unlike the Central Government and other related funds. Another reason is the fact that as an Assembly we have realized how important it is to break the over dependence on Central Government releases considering how untimely these releases have been. The intended strategies have been outlined taking into consideration the revenue items that make up the IGF revenue of the Assembly.

Details of the strategies are outlined on Table 7 below;

Table 7: Revenue Mobilization Strategies
