#### **School Performances**

The performance of school children at the basic level can be described as very poor and this can be attributed to several factors, including teachers' absenteeism and lateness, inadequate supplies of teaching learning materials, parent neglect of educational needs of children, migration, domestic interference, poverty and the generally academic hostile environment. The performance in the 2016 BECE examinations revealed that, the candidates' performance was very poor, as most attained aggregates above 30; with the worse being girls.

#### Pupil Teacher Ratio (PTR)

Associated with teacher population and school enrolment, the PTR of the district could be said to be good considering the mathematical calculation, however the geographical spread of teachers is mostly skewed to the urban, peri-urban and easily accessible communities relative to the deprived rural areas. Hence the favourable ratios are a general situation, rather than area specific in nature.
