PART A: STRATEGIC OVERVIEW

1. ESTABLISHMENT OF THE DISTRICT

1.1 Location and Size

The Atebubu-Amantin Municipal is one of the 260 Districts/Municipalities in Ghana. It is one of the 11 administrative districts in the Bono- East Region. The District was created by a Legislative Instrument (LI 2266) in 2018. The Atebubu-Amantin Municipal Assembly core mandate is to deepen decentralization and make local governance more effective and efficient in terms of service delivery. The Municipal is approximately between Latitude 7° 23N and 7° 55N and Longitude 0° 30 W and 1° 26 W. The Municipal covers approximately a total land area of about 1,996sq km made up of settlements which are mostly rural. The Municipal is part of the transitional zone between the savannah wood land of Northern Ghana and the Forest belt to the south.

It has Atebubu as its capital and shares boundaries with eight (8) other districts namely: Ejura-Sekyeredumase, Nkoranza North, Sene West, Sekyere West, Sene East, Sekyere East, Pru East and West Districts. The Municipal has 33 electoral areas and one (1) constituency (Atebubu – Amantin). The Municipal has eight (8) area councils ie Atebubu, Amantin,New Konkrompe, Jato Zongo, Akokoa, Nyomoase, Kumfia/Fakwasi and Garadima area councils with about 154 communities.

6. DISTRICT ECONOMY

a. AGRICULTURE

Agriculture is the mainstay of Atebubu – Amantin Municipal economy. It employs about 75% of the economically active labour force. Nearly every household in the municipality is engaged in farming of agricultural related activity. The percentage of active male and female population engaged in farming stands at 65% and 35% respectively. The average acreage cultivated ranges between 4-6 acres for all crops. Despite its importance in the municipal economy, much of the agricultural potentials in the municipality remain unutilized. For instance, out of a total of 22,261 hectares of arable land, 3,167.6 hectares is currently utilized.

The irrigation potentials discovered in these seven localities of the municipalities, namely, Jato Zongo, Abamba, New Konkrompe, Amafrom, Nyomoase and Kunkumfo are under development especially Nyomoase and Jato Zongo. This can encourage dry season farming. Currently, crops grown in commercial guantities in the municipality include yam, maize, and rice.

The Municipal has only 12 agricultural extension agents who attend to about 65,687 farmers, spread over 30 extension operational areas. Out of a total of 22,261 hectares of arable land, only 3, 167.6 hectares is currently utilized. Post-harvest losses are common phenomenon and represent a major challenge to the farmers in the municipality. The incidence of post-harvest losses is particularly very high for certain crops like cassava, yam and the highly perishable ones like tomatoes and garden eggs. These losses have come about because of the general lack of knowledge about preservation techniques and the inadequacy of appropriate processing and storage facilities. The high incidence of post-harvest losses affects the income of farmers and has been a disincentive to farmers who want to embark on large scale production.

b. MARKET CENTER

Atebubu - Amantin Municipal has one of the largest market centres in the Bono-East region. The weekly market at Atebubu in the municipality is a major marketing center where commodities produced in the municipality are sent to, for export to other districts and regions. Some crops mostly produced in the municipality include yams, maize, rice and beans. Traders from across the country and outside the country come to trade and buy foodstuffs for export. It is however, export of commodities that generates much revenue for the assembly to enhance in the execution of the developmental projects in the municipality.

However, the market at Atebubu has a huge potential which when harnessed properly can help immensely in the revenue generation effort of the municipality to create jobs and wealth and to accelerate the development of the municipality.

Atebubu Amantin Municipal Assembly 9

c. ROAD NETWORK

Out of the total of 836.4 km road network in the District, only 324 km representing 38.74 percent of the network are engineered with the rest in fair and bad conditions

d. EDUCATION

The proportion of the illiterate population (66 percent) in the municipality is higher than the regional and the national averages of 48.5 percent and 42.1 percent respectively. Though the participation of both sexes in education is high, there has been improvement for girl child education at all levels of academic progression in the municipality. The municipal has 87 primary schools 42 Junior High Schools (JHS), 2 Senior High Schools (SHS) and I College of Education.

e. HEALTH

There are a total of 13 health facilities located in various parts of the municipality. The Doctor –patient ratio is 1: 82,109 whist the nurse patient ratio is 1; 3,205. Malaria continues to be the leading cause of OPD attendance and admission, accounting for 49.9 percent of the total OPD attendance. The prevalence rate of HIV/AIDS in the District is 2.9 percent.

f. WATER AND SANITATION

Eighty-three percent of the municipal's population relies on wells as the source of water. Boreholes are another source of water which is used by the remaining 17 percent of the population. The municipal has a total of 206 boreholes of which 4 are mechanized. Due to the rock formation within the municipality, most boreholes get dried up during the dry season.

Environmental Sanitation is one of the major challenges in the Municipality. The issue of poor solid and liquid waste management has been a daunting task for the Assembly since the Assembly does not have a permanent refuse and liquid waste disposal sites in the municipality. The number of Public toilets is far less than required; this compels a lot of residents to defecate in unauthorized places leading to the frequent cholera outbreaks in the Municipality.

g. ENERGY

Almost all the larger communities in the municipality are connected to national grid. This source of power is also used by the small and medium industries such as artisans and other businesses in the municipality. However, some few communities are not connected to the national grid and as such the Assembly is putting measures to connect these communities.

7. KEY ACHIEVEMENTS IN 2019

The Atebubu–Amantin Municipal Assembly has the mandate as expressed in the Local Governance Act, 936, of 2016 is to ensure the promotion and support of productive activity, social development, initiation of programmes and projects for the development of basic infrastructure and services with the ultimate goal of improving the living standards of its people. The Social Welfare and Community Development Department assist the Assembly to formulate and implement social welfare and community development policies within the framework of national policy.

Extreme poverty continues to work against the economic gains that Ghana has chalked over the past two decades. It is estimated that about 18% of Ghanaians live under extreme poverty conditions. This means that they are neither able to afford daily subsistence requirement nor afford education and basic health for themselves and their children.

This phenomenon perpetuates generational poverty. In order to ensure equitable distribution of national resources and mainstreaming of the extremely poor, Government developed and started implementing the National Social Protection Strategy (NSPS) in 2007. In Atebubu-Amantin Municipality District, 725 households are benefitting from conditional and unconditional cash transfer under the Livelihood Empowerment against Poverty (LEAP) Programme; a component of the NSPS.
