#### 6. DISTRICT ECONOMY

#### a. AGRICULTURE

The Agricultural sector is the largest in the district and employs approximate 78% percent of the workforce and contributes about 60 percent of household incomes. Agriculture in the District is largely undertaken at a subsistence level and farming activities is mostly dependent on natural conditions. An estimated 80 percent of all farms are below one hectare. Only a few of the farmers are engaged in plantation and mechanized farming. The rainfall is bi-modal and supports the cultivation if maize in two seasons (April-June) and (July-September). The major crops cultivated include yam, cassava, millet and sorghum, cowpeas ,rice, groundnut, watermelon, cashew, mango, ginger and tobacco. Vegetable farming has also taken root with the leading crop being tomatoes followed by garden-eggs. Livestock activities are also being carried out in the district. Animals such as cattle, sheep, goats and poultry are produced on household and commercial levels.

#### b. MARKET CENTER

Accessibility to market canters is very poor. The weekly markets at Jema, Apesika, Amoma and Anyima are the main markets in the district. Farm produce such as maize, yam, tomatoes, onions etc. are sold at very cheaper price, depriving farmers of the needed income from their sweat

#### c. ROAD NETWORK

The total road network of feeder roads in the District stands at 324.699 km. Out of the total length of 324.699 km, 136.040 km (41.9%) are engineered, 27.750 km (8.5%) partially engineered and 160.909 km (49.5%) are non-engineered. The District has a total of 226 culverts.

#### d. EDUCATION

There are a total number of 231 educational institutions in the District, out of this number, 90 are pre-schools, 90 primary schools, 48 Junior High Schools and 3 Senior High Schools. Of 231 schools in the District, 206 are public schools and 25 are privately owned.

#### e. HEALTH

The district has been demarcated into six (6) sub-districts by the District Health Directorate, namely Jema, Amoma, Anyima, Apesika, Dumso and Mansie to facilitate access to health services and ensure efficient management of health delivery in the District. The District has a total of twenty (22) health facilities. These comprise of one (1) District Hospital, two (2) health centres, one (1) clinic seventeen (17) CHPS Compounds and one (1) private Maternity Home.

#### f. WATER AND SANITATION

The environmental situation in the district can be described as poor. Open defecation continues to be a major challenge in the district as far as sanitation is concerned. The continuous poor performance of the district in District League Table (DLT) is largely attributable to poor environmental sanitation particularly open defecation. There is no community in the district that has yet been certified as open defection free (ODF). However, efforts are being put in place to scale-up the Community Led Total Sanitation (CLTS) concept and sensitization programmes targeting at behavioural change. The construction of Public toilets will also be pursued to stem the tide.

#### g. ENERGY

The districts major sources of energy for lighting are Electricity, Kerosene and Torch. In the Nkoranza North District, the major source of energy for lighting is electricity constituting 71.7%. This can be attributed to the government's rural electrification program. This is followed by torch with 22.2% and the remaining 6.1% using kerosene. A study in the communities revealed that 10.02% of the

district population does not have access to electricity. This calls for measures to extent electricity to the newly developed areas and also communities which are not connected to the national grid.
