## **SUB-PROGRAMME 5.2 Natural Resources Conservation and Management**

### **Budget Sub-Programme Objective**

- To ensure that ecosystem services are protected and maintained for future human generations.
- To implement existing laws and regulations and programmes on natural resources utilisation and environmental protection.
- Increase environmental protection through re-afforestation

### **Budget Sub- Programme Description**

The Natural Resource Conservation and Management refers to the management of natural resources such as land, water, soil, plants and animals, with a particular focus on how management affects the quality of life for both present and future generations. Natural Resource Conservation and Management seek to protect, rehabilitate and sustainably manage the land, forest and wildlife resources through collaborative management and increased incomes of rural communities who own these resources. The sub-programme brings together land use planning, water management, biodiversity conservation, and the future sustainability of industries like agriculture, mining, tourism, fisheries and forestry. It also recognizes that people and their livelihoods rely on the health and productivity of our landscapes, and their actions as steward of the land plays a critical role in maintaining this health and productivity. The sub-programme is spearheaded by Forestry Section and Game Life Section under the Forestry Commission. The funding for the sub-programme is from Central Government transfers. The sub-programme would be beneficial to the entire residents in the Assembly. Some challenges facing the sub-programme include inadequate office space, untimely releases of funds and inadequate logistics for public education and sensitization.

### **Table 37: Budget Sub-Programme Results Statement**
