## 2018 Annual Public Debt Statistical Bulletin

Figure 1. Trends in Public Debt (2016-2018)

Debt accumulation has been steadily low over the period January 2016 to December 2018, mainly on account of Government's liability management \& reprofiling programme.

However, Government's support to clean up the financial sector led to a huge spike in the growth of debt in Quarter 3 of 2018.

Figure 2. Share of Public Debt (2016-2018)

Since 2014, external debt has been the largest share of the public debt. Within the period under review, however, domestic debt has been increasing steadily.

The issuance of Government bonds to support the financial sector bailout led to the share of domestic debt in the public debt exceeding external debt at the end of 2018.

## 2018 Annual Public Debt Statistical Bulletin

### 2.0 External Debt

### 2.1 External Debt Stock by Creditor Category

Figure 3. External debt stock composition by creditor category, end 2018

Commercial debt continues to be the largest source of external debt liabilities, due to the significant portfolio of Eurobonds. As of end 2018 the Eurobonds constituted 27.9 percent of external debt outstanding, and approximately 67.8 percent of external commercial debt. Multilateral debt which, until Ghana's international capital market access, was the largest source of external debt, is currently the second largest and still a significantly important source of project and programme financing (especially from the World Bank).

## 2018 Annual Public Debt Statistical Bulletin

Figure 4. Trends in currency composition of external debt (2016-2018)

The share of USDdenominated debt remains dominant in the external debt portfolio, with its share increasing over the past years. EUR-denominated debt is the second largest as a share of total external debt.

Figure 5. Currency composition of external debt stock, end 2018

Note: SDR and BUA-denominated loans have been decomposed into their various component currencies.

## 2018 Annual Public Debt Statistical Bulletin

Figure 6. Trends in interest rate composition of external debt (2016-2018)

Fixed rate debt, which consists of loans from bilateral and multilateral creditors, as well as some commercial debt such as the Eurobonds, continues to account for an increasing share of external debt.

Figure 7. Interest rate composition of external debt stock, end 2018
Interest-free debt largely consists of subsidised loans from a few bilateral creditors and continues to dwindle in the external debt portfolio, accounting for approximately 1 percent of total external debt as at end-December 2018.

## 2018 Annual Public Debt Statistical Bulletin

### 2.2 New Commitments (New External Loan Financing Agreements) in 2018

|  |  |  |  |  | 2,971,640,246.9 |

Government signed twenty-three (23) new external loan agreements, amounting to a total value of US $\$ 971.64$ million, and issued a sovereign bond of US $\$ 2,000.0$ million. Of the total value, external financing from non-concessional sources accounted for the largest share of new commitments in 2018.

## 2018 Annual Public Debt Statistical Bulletin

Table 3. Average terms of new commitments (2016-2018)

### 2.3 Disbursements by Creditor Category (New Borrowing)

Table 4. Actual disbursements in 2018

Disbursement on external debt in 2018 was primarily from non-concessional sources, particularly the proceeds of the two-tranche Eurobond of US $\$ 2.0$ billion in May 2018. Disbursements on multilateral debt constituted the second largest source of funding in 2018.

## 2018 Annual Public Debt Statistical Bulletin

### 2.4 External Debt Service Payments

Table 5. External debt service payments

The huge principal payment in May 2018 was as a result of Government's liability management operation carried out to buyback part of the 2022 Eurobond, which recorded the highest principal payment for the year.

Table 6. Currency composition of debt service payments, end 2018

|  | Jan-18 | Feb-18 | Mar-18 | Apr-18 | May-18 | Junn-18 | Jul-18 | Aug-18 | Sep-18 | Oct-18 | Nov-18 |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | Dec-18

A breakdown of the currency composition of external debt service payments in 2018 shows that USD-denominated payments, which consist of debt service payments due commercial creditors, including the Eurobonds, accounted for the largest proportion of debt service payments.

## 2018 Annual Public Debt Statistical Bulletin

### 3.0 Domestic Debt

The proportion of short-term debt to the total domestic debt stock declined in favour of mediumterm debt from 2016 to 2017, due to Government's successful debt re-profiling programme. The increase in long-term domestic debt stock in 2018 is due to the issuance of the Long-Term Government Stock (Bank Bailout).

Banking sector holdings of domestic debt totalled GH\$39,192.07 million (US\$8,127.09 million) by end year 2018, largely reflecting the issuance of GCB and CBG stocks to support the bailout of the financial sector. Domestic debt holdings by non-resident investors fell considerably on account of foreign investor pull-outs from the domestic debt market amidst emerging market challenges in 2018. The stock of domestic debt attributable to standard loans continues to decline as other funding sources are explored.

Figure 8. Share of instruments in domestic debt, end 2018

The proportion of mediumterm debt is dominant in the portfolio of domestic debt, primarily on account of Government's on-going liability management and debt re-profiling programme to restructure the portfolio and reduce the stock of short-term debt.

Note: This classification of domestic debt by tenor includes the stock of non-marketable debt and domestic standard loans.

Gross domestic issuance (face value) totalled GH\$49.2 billion, which was mainly from short-term issuances. Due to market pressures at the time, a number of uncovered primary auctions were recorded in the course of the year, the effect of which was offset through re-opens/tap-ins in the 2 -year and 3-year bonds using the book building process.

Rates on most treasury securities inched up on both the short-term and medium-term segments of the market in 2018. Rates on the 91-day and 182-day treasury bills rose to 14.59 percent and 15.03 percent, respectively, at the end of 2018. The rates on the 1-year note, 2-year note and 3-year bond also increased by 50, 200 and 100 basis points to 15.50 percent, 19.50 percent, and 19.50 percent, respectively. Yields on the 5-year, 7-year and 10-year bonds, however, declined by 110, 350, and 150 basis points to 16.50 percent, 16.25 percent, and 17.50 percent, respectively, during the same period, while that of the 15 -year bond remained unchanged at 19.75 percent.

Figure 9. Yield Curve (at constant maturity)

In 2018, yields of short-term and medium-term instruments increased marginally from 2017, largely due to global developments, whereas yields for the longer-dated instruments declined. This resulted in a humped yield curve for securities in the domestic primary market.

## 2018 Annual Public Debt Statistical Bulletin

### 4.0 Redemption profile of public debt, end 2018

Figure 10. Redemption profile of public debt

The successful implementation of Government's liability management and debt re-profiling programme has resulted in a lengthening of the maturity profile and a smoothening of the amortisation of huge outstanding Eurobonds, which are now mainly back amortising.

## 2018 Annual Public Debt Statistical Bulletin

## Glossary

| Amortization | Schedule for payments of principal on an on-going basis on a loan |
| :--- | :--- |
| Average Time to Maturity | The average time to maturity measures the weighted average time to <br> maturity of all the principal payments in the portfolio |
| Bonds | Debt securities that give holders unconditional right to fixed income or <br> contractually determined payments on a specified date or dates. |
| Buy-back | The repurchase by a debtor government of all or a portion of its external <br> debt at a discount from face value |
| Bilateral Debt | Debt contracted from sovereign countries. |
| Commercial Debt | Short-term borrowing from banking institutions other than <br> Development Assistance (ODA). |
| Concessional loans | These are loans that are extended on terms substantially generous than |
| loans contracted on the market. |  |

## 2018 Annual Public Debt Statistical Bulletin

| HIPCs | Heavily Indebted Poor Countries (HIPCs) comprise a group of 41 developing countries classified as being heavily indebted and poor. |
| :---: | :---: |
| Interest Payment | The amount paid periodically over a period to a lender as compensation for use of his capital. |
| Interest Rate | An interest rate is the cost or price of borrowing, or the gain from lending, normally expressed as an annual percentage. |
| Letter of Credit | A financial instrument that specifies a letter from a bank guaranteeing that a buyer's payment to a seller will be received on time and for the correct amount. In the event that the buyer is unable to make payment on the purchase, the bank will be required to cover the full or remaining amount of the purchase. |
| Maturity | The maturity of a bond refers to the date that the debt would cease to exist, at which time the issuer will redeem the bond by paying the principal. |
| MTDS | A Debt Management Strategy planned to be implemented over the medium-term (three to five years) in order to achieve a composition of a desired debt portfolio with regards to the cost-risk trade-off. |
| Multilateral Debt | Debt contracted from multilateral institutions such as World Bank, IMF and development banks such as the African Development Bank (AfDB). |
| Net Domestic Financing | New debt issuance required to partly fund the budget deficit from domestic sources. |
| On-Lending | Government borrowed funds which are lent to State-Owned Enterprises (SOEs) and small businesses. Government would generally do this as a measure to promote strategic policy objective. |
| Principal Repayment | The act of paying back money previously borrowed from a lender. |
| Promissory Note | An unconditional promise to pay a certain sum on demand on a specified due date. |
| Public Debt | The total public (external and domestic) debt obligations of a country. |
| Public-Guaranteed Debt | Debt liabilities of public and private sector units, the servicing of which is contractually guaranteed by public sector units. |
| Public-Private Partnership | Long-term contracts between two units (one in the public sector and the other in the private sector), whereby one unit acquires or builds an asset or set of assets, operates it for a period, and then hands the asset over to a second unit. |
| Refinancing Risk | The risk associated with debt that is rolled over into new debt |
| Rollover | The extension or transfer of debt from one period to the next. |
| Short-Term Debt | Outstanding debt with a maturity of one year or less. |

## 2018 Annual Public Debt Statistical Bulletin

| Sinking Fund | A fund created by a borrower for the purpose of redeeming bonds. The <br> borrower is obliged to redeem specified amounts of the bond within <br> specified periods. |
| :--- | :--- |
| State-Owned Enterprise $\quad$A legal entity partially or wholly owned by government in order to conduct <br> business on or on behalf of government. |  |
| Yield | The return on an investment or interest received from holding a particular <br> security. The yield is usually expressed as an annual percentage rate <br> based on the investment's cost and current market value or face value. |
| Yield curve | A graph that shows the mathematical relationship, computed across all <br> government securities (or other securities), between yield and maturity. |
