GHANA EXTRACTIVE INDUSTRIES TRANSPARENCY INITIATIVE (GHEITI)

2023 GHEITI ANNUAL WORKPLAN

PREPARED BY GHEITI SECRETARIAT

GHANA EXTRACTIVE INDUSTRIES TRANSPARENCY INITIATIVE (GHEITI)

2023 GHEITI ANNUAL WORKPLAN

The 2023 work plan clearly spells out the GHEITI Secretariat's priority areas as established by the Multi-Stakeholder Group (MSG). In accordance with Requirement 1.5 of the EITI Standard, the MSG, in consultation with key stakeholders, is mandated to develop and publish a current and fully costed work plan based on national priorities of the extractive sector in Ghana and aligned with the reporting and Validation deadlines established by the EITI board. The work plan sets out measurable targets and timelines for the implementation of the agreed activities to attain the intended objectives.

The GHEITI Secretariat and the MSG in consultation with key stakeholders in January 2023, jointly developed a comprehensive work plan to guide the implementation of GHEITI's activities for the period January – December, 2023. The consultative process with stakeholders leading to the development of the 2023 work plan was very broad and comprehensive. Relevant State and non-state actors at the national and sub-national levels as well as industry players and Development Partners within and outside the MSG were involved in the process. Engagements were held with Development Partners such as the World Bank through the Ghana Landscape Restoration and Small-Scale Mining Project (GLRSSMP) Coordinating Unit, the GIZ/SECO and the Natural Resource Governance Institute (NRGI), who have agreed to provide technical and financial support for the implementation of some aspects of the work plan that are aligned with their respective institutional objectives.

There were also engagements with collaborative institutions such as the Office of the Registrar of Companies (ORC), Open Government Partnership (OGP), Ghana Integrity Initiative (GII), Public Interest and Accountability Committee (PIAC), African Centre for Energy Policy (ACEP), Centre for Extractive Development Africa (CEDA), Centre for Social Impact Studies (CeSis) among others, which provided technical inputs into the final workplan. Again, feedback (inputs and concerns) received from stakeholders at the national and subnational levels through GHEITI's engagements/outreach programmes have been duly considered and featured into the work plan.

The work plan seeks to:

- Tackle the key fundamental challenges that still confront Ghana's extractive sector;
- Facilitate Ghana's EITI mainstreaming actual implementation/capture of Beneficial Ownership (BO) information in the system deployed as well as activities related to Ghana's implementation of the Open Extractive Programme (OEP);
- Support the energy transition agenda through policy propositions and discussions with state actors;
- Contribute to the nation's policy discourse and direction of enhancing accountability to supporting Government's continuous pursuit to entrench the principles of good governance across the various sectors; and

• Help in domestic revenue mobilisation from the country's natural resources to support the economic transformation agenda of the Government.

This document therefore lays down the framework that links planned strategic activities, objectives and deliverables with clearly stated responsibilities, budget, timelines and expected outputs for the year. The MSG in order to achieve the work plan's objectives will among others, execute key activities towards ensuring continuous collaboration and engagement with key stakeholders to consolidate gains made from policy/legislative reforms to actual implementation of Beneficial Ownership (BO) regime under the Opening Extractives Programme (OEP), the energy transition, mainstreaming issues and engagement of Artisanal and Small Scale Mining (ASM) Sector players under the Ghana Landscape Restoration and Small-Scale Mining Project (GLRSSMP), just to mention a few. There will be a mid-year review of the work plan by the MSG to track progress of implementation with a view to ensuring that the planned activities, budget and timelines are realistic, and still in line with the broader national priorities/objectives of the country given the exigencies of the time.

In view of this, the work plan has been categorised into the following broad objectives to aid smooth implementation and monitoring.

The objectives include the following:

- 1. Enhance citizens participation in decisions around resource extraction along the value chain;
- 2. Show the impact of EITI to the Economy (Direct and Indirect Contribution);
- 3. To improve routine disclosure of Government, SOE and company Information (Production, export, sub-national transfers, quasi fiscal expenditures and state participation information through mainstreaming);
- 4. Capacity Building of the Secretariat, MSG and Other Stakeholders;
- 5. To strengthen the reporting or disclosure process of natural persons behind the ownership of corporate bodies with a view to reducing corruption and improving natural resource governance;
- 6. Strengthen Revenue Management and Natural Resource Governance; and
- 7. Promote stakeholder engagement in ASM

Justification and Scope of the Work Plan

The current GHEITI work plan further entrenches transparency and accountability along the entire extractives value chain including license allocations, material payments and receipts, revenue collection, management and utilisation with a view to enhancing

development outcomes as espoused by the EITI Standard. The implementation of the activities in the work plan is well aligned with national priorities and can contribute effectively towards the promotion of good governance and achievement of Government Economic Transformation Agenda using our natural resource wealth.

Legislating the transparency and accountability provisions of the extractive industry governance alongside mainstreaming the data disclosures, continuous capacity building and stakeholder engagements on the GHEITI reports will empower the citizenry both at the local and national levels with the right information to participate effectively in decisions around our natural resources.
